PROFESSIONAL SUMMARY

Recent Software Development graduate from Dundalk Institute of Technology. Enthusiastic about creating reliable software and committed to continuous learning and professional development.

EXPERIENCE

Production Operative

Jan 2026 — Jan 2026

Owens & Minors Healthcare

Kells, Meath

- Picked, packed, and moved medical supplies in a high-volume warehouse environment while meeting strict accuracy and safety standards.
- Maintained a clean, organized, and safety-focused working environment.

Software Engineer Intern

Jan 2024 — Aug 2024

Kaseya

Dundalk, Louth

- Contributed to an agile full-stack team to enhance the Kaseya Quote Manager using .NET, MySQL, JavaScript, and SCSS by delivering new features and fixing cross-stack defects, improving application performance and user experience.
- Developed a C# utility to automate image modification and database insertion, significantly reducing image update time and eliminating manual steps.

Transcriptionist

Nov 2021 — Aug 2022

Rev

Remote

- Handled sensitive data responsibly, maintaining confidentiality and attention to detail.
- Met strict deadlines while maintaining accuracy and quality standards.

EDUCATION

Dundalk Institute of Technology, Dundalk, Louth

Sep 2021 — Oct 2025

BSc (Hons) in Computing in Software Development

GPA: 2.1

SKILLS

Programming Languages: JavaScript, Java, Python, HTML, CSS, C#

Databases: MySQL, MongoDB

Version Control & DevOps: Git, Github, Docker

Frameworks: React, .NET, Springboot

PROJECTS

Http Visual Debugger | Python, SQLite, ReactJS, Mitmproxy

- Built a feature that implements a local HTTP(S) interception proxy to capture, inspect, and persist live browser traffic in real time, enabling detailed request/response analysis, debugging, and traffic replay.

MatCron | Flutter, MySQL, NFC

- A textile-tracking mobile application designed to comply with EU Digital Product Passport regulations, featuring a cross-platform Flutter app with a MySQL backend, NFC tag scanning for product identification, and full backend integration to enable end-to-end product traceability.

AI Logs Handler | Java, Springboot, MySQL, Gemini API

- This project is an Ai Powered Spring Boot service that uses Gemini API to help DevOps and Software Engineering teams analyze large volumes of logs. The system identifies root causes, summarizes incidents, detects anomalies, recommends fixes and provides chat-based troubleshooting.
